SUMMARY

Member of Technical Staff at Zoho with 3 years building **Vani**, an intelligent visual collaboration platform centered on a real-time, infinite-canvas whiteboard. Works on the cross-platform editor in C++, WebAssembly, and JavaScript on the Skia rendering engine — a move from SVG that improved in-browser rendering performance by 100–150% — and maintains its Connectors module. Over the past year, integrated AI features and is now researching how to convey the board's visual context to an LLM.

EXPERIENCE

Member of Technical Staff — Zoho Corporation (Vani) 2023 – Present
Chennai, India · Client & Editor Development

- Develop the editor for **Vani**, Zoho's visual collaboration platform — an infinite-canvas whiteboard (similar to Miro and Figma) for real-time, multi-user collaboration used within Zoho and by external users.
- Contributed to migrating the editor's rendering from **SVG to a C++/Skia engine (WebGPU)**, improving in-browser rendering performance by **100–150%** and enabling a single C++/Skia codebase to support the editor across **four platforms** (web, macOS, Windows, and Android).
- Maintain the **Connectors** module — a large part of the editor — as its primary developer, owning the codebase and shipping features in C++, WebAssembly, and JavaScript, and mentoring junior developers.
- Built the platform's **AI features** in Java, generating per-board **embeddings** stored as SQLite files; currently researching how to convey the board's visual context to an LLM to improve accuracy.
- Contribute to the upcoming **Agentic Whiteboard** feature with peers, focusing on **orchestration** and **SDK** development.

TECHNICAL SKILLS

Programming Languages	Java, C++, JavaScript
Graphics & Rendering	Skia, WebGPU, WebAssembly
Build Toolchain	Emscripten, CMake, Git
Real-time Collaboration	WebSockets, Operational Transform (OT)
AI	LLM integration, embeddings, context extraction
Web / Frontend	HTML, CSS, SCSS
Databases	PostgreSQL, SQLite

PROJECTS & INTERESTS

- Build side projects with **Next.js**, **Prisma**, and **Tailwind CSS** to simplify everyday tasks.
- Explore open-source projects such as **Excalidraw**, **Supabase**, and **Payload CMS** to study how they're engineered.

EDUCATION

B.E. Computer Science and Engineering 2019 – 2023
Misrimal Navajee Munoth Jain Engineering College, Chennai · CGPA: 8.65

LANGUAGES

Tamil (native) · English (professional — read, write, speak) · Kannada (conversational)
